

Medical Supplies Catalogue

Issue 1

MediPro[★]

Welcome to our 2014 medical supplies catalogue. We have compiled these sets of equipment with the help of several extremely knowledgeable people who work in the ambulance, hospital, security, close protection, military and fire services. We are confident that the equipment we can provide you is tried, tested and approved by people who actually work in your sector and deal with the type of situations that you face.

There is new innovative equipment such as the Victims Hypothermic Bag (PH44) and the iT Clamp (FA43) which are sure to save many lives, along with must haves, such as stethoscopes and BP cuffs. Our range of AEDs and Defibrillators are some of the most competitively priced in the market, coupled with the fact that we are well placed to also provide you with the training to use these devices, you can be assured of an excellent comprehensive service.

If you have any queries about any of items in this catalogue then please do not hesitate to contact us, and you will be answered by a medical professional that has real life experience of how the item is used.

Because emergencies come in all shapes and sizes...

Broselow Hinkle™ Paediatric Emergency System

Product Code: BG20

When children need emergency treatment the Broselow Hinkle™ Paediatric Emergency System provides a fast, accurate method for equipment selection and drug dosages. Paediatric emergency cases have clinical requirements dramatically different from those of adults. Children vary a great deal in size, and the opportunities for a doctor to get in depth experience across all size ranges are limited. The Broselow Hinkle™ Systems helps build that gap.

The Broselow Hinkle™ System utilises colour to categorise patients and simplify emergency care. The system consists of the Broselow Paediatric Emergency Tape, a reusable guide containing information regarding common drug dosing and emergency equipment at the most chaotic of times. The emergency equipment is pre-sized and packaged into seven specific modules, reducing confusion and expediting care.

First, the child's length is measured and one of seven colour areas assigned. Next a coordinated Colour Pack is pulled from the The Broselow Hinkle™ System to begin a procedure with the right sized equipment. The system offers seven colour-coded nylon packs for children weighing from 3-34 kilograms.

Benefits of the system

- Ensures the correct selection of the right sized equipment
- Provides immediate access to critical supplies every time
- Utilises proven clinical methodology
- Decreases equipment inventory, re-stocking and ordering time

Complete Broselow Hinkle™ System contents:

The complete organiser system includes the Broselow Paediatric Emergency Tape and seven colour-coded pouches, each containing four equipment modules: intubation, IV, intraosseous and oxygen delivery (contents listed below). It also includes laryngoscope handles, resuscitator bags, blood pressure cuffs and manometer and forceps. The colour-coded pouches are attached with velcro backing to a flying carpet, making removal swift and easy. The other equipment is contained in a separate clear pocket in the bag, allowing the user to clearly view the required devices in a paediatric emergency. The seven colour-coded pouches include:

Intubation Module	Red Pouch	Purple Pouch	Yellow Pouch	White Pouch	Blue Pouch	Orange Pouch	Green Pouch
Laryngoscope Blade	1	1	2	2	2	2	2
Endotracheal Tubes	2	2	2	2	2	2	2
Stylet	1	1	1	1	1	1	1
Suction Catheter	1	1	1	1	1	1	1
Nasogastric Tube	2	2	1	2	2	2	1

Sam Sling - Pelvic Splint

£44.00

Product Code: PH09

The SAM Pelvic Sling™ is an improved, simpler design with no detachable hardware. It is more compact, easy to use (only three steps), quick to apply (usually in less than one minute), and is sized to fit (without cutting or trimming) 98% of the adult population does not require a fine touch to operate and gives clear feedback by sound and feel to confirm correct application.

The sling is durable i.e. not by extremes of moisture, temperature, or by exposure to hard or sharp objects. It is also radiolucent, MRI safe, and cleans for re-use with common detergents or anti-microbial solutions.

- Scientifically and clinically proven to provide safe and effective force to stabilise pelvic
- Buckle maintains correct force, cannot be over-tightened
- 'Click' provides clear feedback to confirm correct application
- Pulling gradually and symmetrically increases sling tension and reduces the pelvis
- Low friction posterior slider facilitates transfers
- Front of Sling is narrow and tapered to facilitate urinary catheterisation, interventional radiology, external fixation and abdominal surgery
- Fabric does not stretch and cleans for reuse with standard detergents or antimicrobial solutions
- Radiolucent (allowing for X-Rays without removal)
- Ease of application; just insert belt through buckle, pull strap, and secure
- Velcro on strap and sling for quick and easy fastening
- Reusable, not a onetime use device
- Standard size fits 98% of population, every sling is tested for quality

Small (27 - 47in) / Medium (32 - 50in) / Large (36 - 60in)

PH32

Lewis Pelvic Applicator

£49.95

Product Code: PH32

When the pressure is on, knowing that you have the right equipment, at the right time for the right casualty is reassuring. When dealing with stressful environments, whether it is first aid or roadside critical care, the Lewis Pelvic Applicator™ (LPA) ensures safe, fast and correct application, facilitating the stabilisation of suspected or indicated pelvic fractures.

- Can be used to enable pelvic stabilisation direct to skin prior to next triage
- Facilitates fast and safe pelvic stabilisation (under 20 seconds)
- Minimises friction forces
- Minimal movement caused to the casualty aiding pain relief and assisting internal haemorrhage control
- Lightweight and easy to carry
- Durable with high strength to weight ratio
- Flexible, will follow the surface contour eg. car seat, road, path, mattress
- Complements existing pelvic supports and slings
- Reusable
- Easy to clean

Pelvic fractures are one of the life threatening injuries associated with trauma patients, which can lead to severe uncontrollable haemorrhage and death related to prolonged shock and multiple organ failure. These type of fractures should always be suspected in casualties who have sustained high-energy injuries. Proper pre-hospital management of suspected or indicated or pelvic fractures will decrease the incidence of pain, disability and serious complications. The use of commercial pelvic binders or sheets to circumferentially stabilise will decrease internal bleeding from an unstable pelvic fracture.

PH31

T-Pod® Pelvic Splint

£70.00

Product Code: PH31

The T-Pod® Pelvic Stabilizer from Pyng is a rapid and effective device for treating pelvic trauma, pain, and bleed-out while preventing loss of life. With its patented circumferential tightening mechanism, T-Pod® is the only external fixation device shown in independent clinical studies to be equivalent to a surgical procedure in achieving stabilization, while also mitigating patient discomfort. T-Pod® is used extensively by civilian first responders in motor vehicle accidents and by medics on the battlefield, especially in incidents involving improvised explosive devices. When treating a pelvic injury or significant pelvic pain, T-Pod® is a fast, simple, effective, and non-invasive lifesaving device. The specially engineered Mechanical Advantage® pulley allows T-Pod® to be easily drawn closed without straining and ensures safe, balanced, pelvic compression. By using simultaneous circumferential compression and secure closure, T-Pod® can hold the pelvic ring closed for up to 48 hours without loss of pressure. Reduced blood loss and reduced pain mean fewer complications and shorter hospital stays.

Complete: Specially engineered pulley system ensures even pelvic compression and stabilization

Easy: Single-handed tightening with no straining

Adjustable: One size fits most physiologies, easily trimmed for custom fit; two can be secured together for obese patients

Flexible: Non-metal fabric belt

Compatible: 100% radiolucent, X-ray, CT, and MRI compatible

Safe: Latex-free

PH16

Kendrick Extrication Device

Product Code: PH15

The Kendrick K.O.D.E. 1 Vest is designed to safely and securely remove a victim from even the most dangerous positions. A time-proven design, this rescue vest is the best fracture management tool for emergency medical personnel to fully immobilise a victim and remove them quickly. Constructed with tri-laminated rip stop nylon for long wear in the field, it also features colour-coded nylon straps, lifting handles, reusable head/chin straps, adjustable neck pad and carrying case.

PH15

PH15	Kendrick extrication device (K.E.D)	£89.00
PH16	Replacement head/chin straps for K.E.D	£19.95

Pro-Lite Speedboard® Complete

£158.00

Product Code: PH04

The Speedboard® works perfectly, even in today's bucket seats and it is quick to apply. Three easy colour-coded straps apply quickly in a cross strapping method. While in place they also help to keep the C-collar secure. The speedboard does not constrict the inter-costal muscles as with other vest style short extrication devices. The HDPE plastic is easily decontaminated and the straps are disposable. The carry case is large enough to fit a set of collars, and straps.

PH04

PRO-LITE
SPEEDBOARD®

PH17 (set)

Immobile-Vac™ Vacuum Splints

Product Code: PH17/PH18/PH19/PH20/PH21

Forms around injured extremity without exerting external pressure. Accessibility for patient and injury site monitoring. Can be remoulded to accommodate swelling that may occur after application.

PH17	Immobile-Vac vacuum splints (set)	£265.31
PH18	Immobile-Vac vacuum splint (ankle/wrist)	£61.00
PH19	Immobile-Vac vacuum splint (arm)	£63.89

PH25 example of use

PH22

Immobile-Vac™ Vacuum Mattress

Product Code: PH22/PH23/PH24

Has the same durable and easy to use features of the full body mattress but is designed to adapt to a wider variety of injuries including paediatric immobilisation needs.

PH22	Immobile-Vac full body mattress	£320.00
PH23	Immobile-Vac full body mattress (mattress only)	£235.00
PH24	Immobile-Vac double action mattress pump	£40.00
PH25	Immobile-Vac Paediatric vacuum mattress (set)	£195.00

Ferno Scoop™ 65 EXL Stretcher

£565.00

Product Code: PH26

This ergonomically designed lightweight stretcher facilitates access to awkward low spaces and allows easy movement in confined areas. It is ergonomically designed from high strength aluminum and precision mouldings allowing light weight with considerable strength. The biggest advantage of the scoop™ is that it enables easy access to awkward low spaces and makes movement of the body easy in confined areas.

- Twin safety lock hinges allow fast uncoupling of one or both ends
- Resistant to corrosion, heat, cold and body fluids
- Seamless construction makes cleaning easy
- X-Ray translucent
- Oval profile and angled handles provide ergonomic ease of use

Dimensions:	2010 x 430mm x 70cm
Weight:	8kg
Load Capacity:	159kg

PH33

Iron Duck Ultra Spac Sav® Folding Board

Product Code: PH07/PH08

The Iron Duck Ultra Spac Sav® Board has the same distinct advantages of the original Iron Duck Ultra Board, with the added space saving benefits of a folding board.

Open Dimensions: 183 x 41 x 4.5cm
Folded Dimensions: 103 x 41 x 9cm
Weight: 9.5kg
Load Capacity: 182kg

Colours available: Blue ● Yellow ●

PH07	Iron Duck ultra spac board (blue/yellow)	£275.00
PH08	Iron Duck carry case	£96.75

PH28

Economy Spinal Board

£103.00

Product Code: PH34

The lightweight, smooth tapered spineboard is a single piece moulded construction that offers durability and easy cleaning. With the new offset pins you can now use straps that use loop end or speed clips. The large handholds are designed to accommodate gloved hands. This sturdy board provides minimal deflection with significant reduction of spinal disturbance to the patient. 100% X-Ray translucent allows for clear view of the entire patient. Compatible with most head immobilisers.

Dimensions: 183 x 46 x 5cm
Weight: 5kg
Floatation Capabilities: 159kg

Pedi-Loc Paediatric Immobilisation System

£190.99

Product Code: PH33

Combines cervical stabilisation with an immobilising system for transport. Designed for children of a weight up to 30kg and of a height between 60 and 120cm. The abdominal, shoulder and thorax belts, can be varied in length and the use of Velcro® makes the control of the breathing and of the heartbeat of the child easier. The position of the belts can be varied to give the maximum of stability and comfort to the patient. The cover in Spentex® is easily washed after use. The Velcro® closings allow for the easy removal of the cover for machine wash-board is X-ray compatible to permit the execution of X-Rays, CAT scan and MRI investigations. A layer of laminated, closed cell, polyurethane foam gives the board a natural alignment for the spine and increases the comfort of the patient.

PH07

PH08

Pro-Lite XT Spinal Board

Product Code: PH27/PH28

A seamless design prevents fluids from entering eliminates cross-contamination. Two boards can be nested together in approx. 10cm space. Available with or without speed clips. Guaranteed 100% X-Ray translucent between hand-holes. Stiffeners in handholds make the XT the strongest completely translucent spineboard available. Unlimited single-patient weight capacity. Floatation capabilities of 136kg.

Dimensions: 183 x 41 x 5.75cm
Weight: 5.7kg
Floatation Capabilities: 136kg

Colours available: Blue ● Orange ●

PH35

PH35 example of use

PH36

Hartwell Combi-Carrier II

Product Code: PH35/PH36

The Combi-Carrier II has all the features of the original Combi-Carrier but is also thinner, stronger and lighter. Can be easily separated at either end. Eliminates unnecessary movement making it ideal for patients with suspected hip, pelvic, and spinal injuries.

Versatile Spinal Immobilisation Device

May be used as a scoop stretcher or a full backboard.

Simple, Intuitive Design Minimises Training

Minimise training of EMS and hospital personnel. Reduces maintenance and replacement costs.

Lower Profile

Updated, thinner board with a smaller diameter hand-hold improves ergonomics and fits in standard storage compartments.

Move the board not the patient

Can be separated at either end or split into two halves, eliminating unnecessary movement and making it ideal for patients with suspected hip, pelvic and spinal injuries.

X-Ray Compatible

Clear center section provides unobstructed A/P view of patients spine. Split-design allows for simple, easy removal and reapplication for detailed X-ray examination.

Auto-Lock Latch System

Easier to access, recessed side latch is positioned away from patient.

Locks instantly during application. Manual release required during removal from patient.

Continuous Head Support Surface

Improves neutral alignment and minimises head movement during application and removal and accommodates the Combi-Carrier II Head Immobiliser.

Concave Patient Surface

Provides excellent lateral support and improves patient's sense of security. Minimises movement of patient's spine during lifting and transport. Continuous inner edge eliminates panel pinch points.

Seamless Plastic Construction

No rivets, drive screws or roll pins. High density polyethylene is easily cleaned and disinfected. Helps comply with CDC and OSHA guidelines. Foam filling makes it ideal for water rescues.

Dimensions: 186.7 x 41.9 x 5.6cm
Weight: 7.1kg
Load Capacity: 205kg

PH35	Hartwell combi carrier	£570.00
PH36	Hartwell combi carrier head immobiliser	£70.99

Curaplex Extrication Collar

Product Code: PH02/PH03

The easy-to-use Curaplex Extrication Collars provide a cost-effective and space-saving solution to providing excellent neck immobilisation. Equipped with an automatic flip up chin and two locking buttons, the Curaplex Extrication Collar can be placed on the patient using 3 simple steps; sizing - locking - placement. Available in both Adult and Mini sizes, with a combined total of 14 different adjustable settings, the choice of Adult and Mini Curaplex Extrication Collars allows the majority of patients to be treated. Additionally, the design of the collar allows for adjustments to be made both on and off the patient as well as having cannula hooks for securing oxygen tubing.

- Single use
- Automatic flip up chin piece
- Available in Adult and Mini sizes with a combined total of 14 different adjustable and lockable settings
- Cannula hooks for securing oxygen tubing
- Hook ribs for ease of use
- Flat storage
- CT and MRI compatible

PH02	Curaplex Extrication Collar	£7.25
PH03	Mini Perfit Ace Collar	£7.25

PH41

Cerviguard

Product Code: PH29/PH30

The Cerviguard system is a foam-filled, lightweight cervical immobilisation device (CID) that complies with the national basic trauma life support recommendation. The cerviguard system is inexpensive, designed to be disposable and frees you from the worry of losing expensive CID's at the hospital. Cerviguards are 6ml polyethylene and durable enough to re-use. They feature sealed seams, and are both puncture and water resistant.

PH29	Cerviguard (pack of 2)	£6.89
PH30	Cerviguard with straps	£10.45

PH42

PH02

Bound Tree Head Immobiliser **£51.99**

Product Code: PH41

The versatile head immobiliser by Bound Tree Medical accommodates most extrication collars or can be used as a stand-alone immobilisation system. It provides firm control of head movement while helping to maintain proper cervical spine alignment without causing patient discomfort. Constructed from specially coated foam, this head immobiliser will not absorb blood or body fluids, is easily sanitised between use and is not effected by adverse weather. A large ear hole in each head block permits easy monitoring of the patient's ears for haemorrhage or drainage. Its metal-free design permits X-Rays, CT scans and MRI's. The head immobiliser set comes complete with two head supports, a universal base and two head straps.

Head Immobiliser Set includes;

- Universal Base
- Head Support Blocks
- Head/Chin Straps

PH30

Replacement Antibacterial Spine Board Strap **£13.50**

Product Code: PH42

- No exposed fibres
- Softer and more pliable
- Bright Colour
- Flexible in extremely low temperatures
- Almost impossible to stain

PH10 open and rolled up view

XF Roll Up Stretcher

£76.00

Product Code: PH10

The Conterra Patrol XF Roll Up Stretcher is a compact and flexible roll up stretcher that can be used as a stand alone tool for emergency extrication. The Patrol XF Roll Up Stretcher can also be attached to the bottom of the Conterra Patrol XF aid belt (sold separately) for emergency patient transport in the field.

Dimensions:

Rolled: 15" x 15" x3"

Unrolled: 15" x 55"

Weight: 1lb 5oz

Colours available: Coyote Brown ●

Dragon Handle

£44.00

Product Code: PH01

Designed to be utilized during Care Under Fire, to address both rapid personnel recovery and threat suppression in hostile environments. It enables 1-2 rescuers to rapidly extract casualties from the point of wounding to cover, while maintaining the tactical initiative. The Dragon Handle is 42" long.

Specifications:

- 1" Tech Tape, Tensile Strength: 4200lb
- Slip Resistant Handles
- Floating Black Bull Ring
- Black Omega, Non-locking "D" Carabiner Rated for 31kn (6968.8lb)
- Reinforced Stitching

Special Features:

- Keeps Casualty Low Profile
- Exponentially Faster Drag with Less Physical Exertion
- Head First or Feet First Drag
- Reduces Rescuer PPE Displacement

PH01

Poc-Kit Stretcher

£39.99

Product Code: ????

The versatile Poc-Kit is a multi-purpose, lightweight, high speed evacuation stretcher.

Contained in a draw string pouch that can be carried on a belt, the stretcher is deployed in seconds and saves valuable time in emergency casualty evacuation.

Manufactured from a tough microlight polyester material with reinforced construction.

- Features six strong carrying handles.
- Two stitched tubes ends allowing poles to be threaded through for use as a bivi/basha
- Can also be easily utilised as a ground sheet or for concealment purposes
- One size fits all
- Tested up to loads of 23 stone
- Packed weight: 264g

Colours available: Black ●

?????

PH05

Sam Splint Roll

£8.20

Product Code: PH05

Acclaimed by emergency care providers and outdoor activity centres worldwide, the SAM® SPLINT is based on a universally recognised engineering principle: curves are strong.

Built from a thin core of aluminium alloy, sandwiched between two layers of closed-cell foam the SAM® SPLINT is extremely mouldable, and soft enough to cut with ordinary household scissors. Yet when bent into any of three simple curves, it becomes extremely strong and supportive for any fractured or injured limb. With the proper choice of curves almost any bone in the body can be splinted. It's even possible to use the SAM® SPLINT to create an emergency cervical collar for neck injuries.

Colours available: Grey ● Orange ●

PH43

Kendrick Traction Device

£95.00

Product Code: PH43

The KTD is a femoral traction device that is small enough to fit in a first aid kit yet adjusts to treat both adult and paediatric patients. The KTD eliminates the need to roll the patient or raise the leg during application. Pressure problems are not an issue due to the KTD not using an Ischial bar. Application variations allow you to work around the problem of hip and groin trauma situations. The KTD comes with a convenient storage pouch and easy to follow instructions.

Packed Dimensions: 24 x 9cm

PH06
(in black)

Faretec CT-6 Traction Splint

£95.00

Product Code: PH06

The CT-6 is probably the most advanced traction splint available today. Improvements in design and construction using both carbon fibre and Zytel make this splint the correct choice for tough field appliances when top performance is expected at all times and under all conditions.

The CT-6 features a 4:1 Adjusting System which produces more power than the standard strap system. Also it allows for micro adjustment to generate a precise amount of traction. The easy locking system means that subsequent adjustment during transport is easy to apply.

Modern construction techniques produce a splint that is lighter than the competition while at the same time being stronger and more impact resistant.

Colours available: Black ● Orange ●

PH12

Plastic Basket Stretcher

£379.00

Product Code: PH12

A Rigid Basket Stretcher With Multiple Hand Holes & Lifting Points & Foot Plate. Designed For Hand, Rope Or Helicopter Rescue. Suitable for a wide range of rescue situations. Strong polythylene and aluminium structure. Adjustable lifting bridles available quick release patient restraints supplied. Moulded in runners and handholds. Resists chemicals and extreme temperature. A strategically placed lifting grommets. This shell is a new design - for a wide range of rescue situations. The shell is built from high density cross linked polyethylene - this avoids splintering and cracking. The surface is impervious to body fluids and petroleum products - being easy to keep clean. Basket is a non-absorbent orange colour, will not rust or corrode, resistant to effects of chemicals and temperature extremes. Tubular aluminium frame is permanently fastened to the shell to ensure maximum strength and rigidity of the stretcher. Moulded-in runners and handholds. Built in brass grommets provide four strategically positioned lifting points to ensure a safe and effective means of raising or lowering the patient. Easily cleaned and disinfected. Superior technology, including three quick-release restraints to hold the patient securely.

Dimensions: 217 x 62 x 18.5cm - 13.5kg
Weight: 278kg

2 Piece Plastic Basket Stretcher

£559.00

Product Code: PH14

A Two Part Rigid Basket Stretcher With Multiple Hand Holes & Lifting Points & Foot Plate. Designed For Hand, Rope Or Helicopter Rescue. Suitable for a wide range of rescue situations. Strong polythylene and aluminium structure. Adjustable lifting bridles available quick release patient restraints supplied. Moulded in runners and handholds. Resists chemicals and extreme temperature. A strategically placed lifting grommets. This model also breaks in two for more difficult and technical rescues.

Dimensions: 217 x 62 x 18.5cm - 13.5kg
Weight: 278kg

PH14

PH44

Victims Casualty Hypothermia Bag

£380.00

Product Code: PH44

A Victims Casualty Hypothermia Bag is a user friendly search and rescue bag for securing and saving lives in the most extreme conditions. Waterproof interior and exterior fabric. International orange top with black lining and bottom. The bottom is 1000-denier cordura and the lining and top are 200 denier Oxford nylon L-12oz insulation. No 10 YKK zippers throughout. The top half of the bag separates completely from the bottom half for easy victim placement and for sanitisation washing after use. The zippers can be opened from either end and either side to provide excellent service to the victim. There is a zipper in the middle of the foot/leg area to expose a portion of either leg. A pocket panel can be opened at waist level for mid section access. Each arm has an access point that does not require opening the zipper. For head trauma, individual sides or the full head can be exposed. A chest pocket is located inside the bag for any necessary additional heaters. 8 man carry feature provides adequate space on either side of the bag for on foot extractions. Adjustable rescue litter straps run the length and width on the underside of the bag.

Dimensions: 11" x 23" (uncompressed)

DE60

DE61

Lucas® 2 Chest Compression System

Product Code: DE57/DE58/DE59/DE60/DE61

Lucas® delivers effective and consistent chest compressions with a minimum of interruptions. Better than manual CPR, Lucas® delivers compressions according to guidelines:

- >5cm/2" depth
- >100 compressions per minute
- Equal time for compression / decompression
- Full chest recoil

Lucas® has shown to significantly improve quality and increase consistency of compressions compared to manual CPR, both at the scene, during ambulance or helicopter transportation, as well as in the cath lab setting.

In pre-hospital use, at the scene and during transportation. Lucas® has shown to significantly increase chest compression fractions to around 90% compared to manual CPR.

Lucas® has shown to improve blood flow to the brain compared to manual CPR in pre-hospital patients (60% increase as measured by Doppler). These findings are consistent with results from experimental studies. In addition, brain circulation as measured by cerebral oximetry during prolonged Lucas® compressions has shown values exceeding previously published values during manual CPR. Both human and experimental studies have shown that Lucas® can produce coronary perfusion pressures of over 15mmHg during prolonged CPR, better than manual CPR. Lucas® has shown to significantly increase EtCO₂ levels, compared to manual CPR in a prehospital, controlled clinical study as well as in experimental studies.

DE41

ResQPOD® Impedance Threshold Device **£79.95**

Product Code: AO41

The ResQPOD® is an impedance threshold device (ITD) that provides Perfusion on Demand (POD) by regulating pressures in the thorax during states of hypotension. As a result, cardiac output increases and circulates more blood to the brain and vital organs.

Animal and clinical studies have shown that during CPR, the ResQPOD®:

- Increases survival from sudden cardiac arrest by 25% or more
- Doubles blood flow to the heart
- Increases blood flow to the brain by 50%
- Doubles systolic blood pressure
- Increases survival rates
- Increases the likelihood of successful defibrillation
- Provides benefit in all arrest rhythms
- Circulates drugs more effectively

During CPR, the ResQPOD® restricts unwanted airflow back into the lungs as the chest recoils. This allows the negative pressure being created in the thoracic cavity to act on the circulatory system and push more blood to the brain and vital organs. With more oxygen-rich blood in the heart and perfusion occurring in the vital organs, the chances of successful defibrillation increase!

“Provides a unique way to increase circulation during CPR by refilling the heart with blood after each chest compression”

The American Heart Association (AHA), in their 2010 guidelines, designated the impedance threshold device (e.g. ResQPOD®) a Class IIb recommendation for increasing blood flow and immediate survival rates in patients in cardiac arrest.

Vinyl Disposable BVM

Product Code: AO02/AO03/AO04

The Laerdal Pocket mask is the most widely used latex-free CPR mask in the world. It's one-way valve and 3M Filtrete hydrophobic filter give effective ventilations and outstanding user protection. Pre-inflated cuff allows for ease of application while making an effective seal. Oxygen inlet version facilitates delivery of supplemental oxygen to breathing and non-breathing patients. Replaceable, disposable one-way valve. Available with latex-free, powder-free nitrile gloves, headstrap and antimicrobial wipe to help maximise user protection.

Laerdal Pocket Masks **£5.86**

Product Code: AO32

The mediprene latex free nasopharyngeal airway has a fixed flange as preferred by many professionals. Set of 6 airways is also available with sizes: 20, 24, 26, 28, 32 and 36 french.

i-gel Supraglottic Airways

Product Code: AO17/AO18/AO19

i-gel is a truly unique, single use, supraglottic airway management device that represents the culmination of years of extensive research and development. Made from a medical grade thermoplastic elastomer, i-gel has been designed to create a non-inflatable, anatomical seal of the pharyngeal, laryngeal and perilaryngeal structures whilst avoiding compression trauma. i-gel is currently available in several sizes and is supplied in an innovative, colour-coded polypropylene 'protective cradle.'

i-gel gets its name from the soft gel-like material from which it is made. It is the innovative application of material that has enabled the development of a unique non-inflatable cuff. This key feature means inserting i-gel is easy, rapid and consistently reliable. A proficient user can achieve insertion of the i-gel in less than 5 seconds. No inflatable cuff, i-gel provides a safe and rapid airway management solution.

- 15mm connector - reliable connection to any standard catheter mount or connection
- Clearly displayed product information - for quick, easy reference and confirmation of size and weight guidance
- Position guide - easy confirmation of optimum insertion depth
- Gastric channel - improves and enhances patient safety, and allows for suctioning and passing of a nasogastric tube and facilities venting
- Integral bite block - reduces the possibility of airway channel occlusion
- Buccal cavity stabiliser - aids insertion and eliminates the potential for rotation
- Epiglottis blocker - reduces the possibility of epiglottis 'down folding' and airway obstruction
- The non-inflatable cuff - made from a unique soft gel-like material allowing ease of insertion and reduced trauma
- Latex free

AO17

VBM Laryngeal Tubes

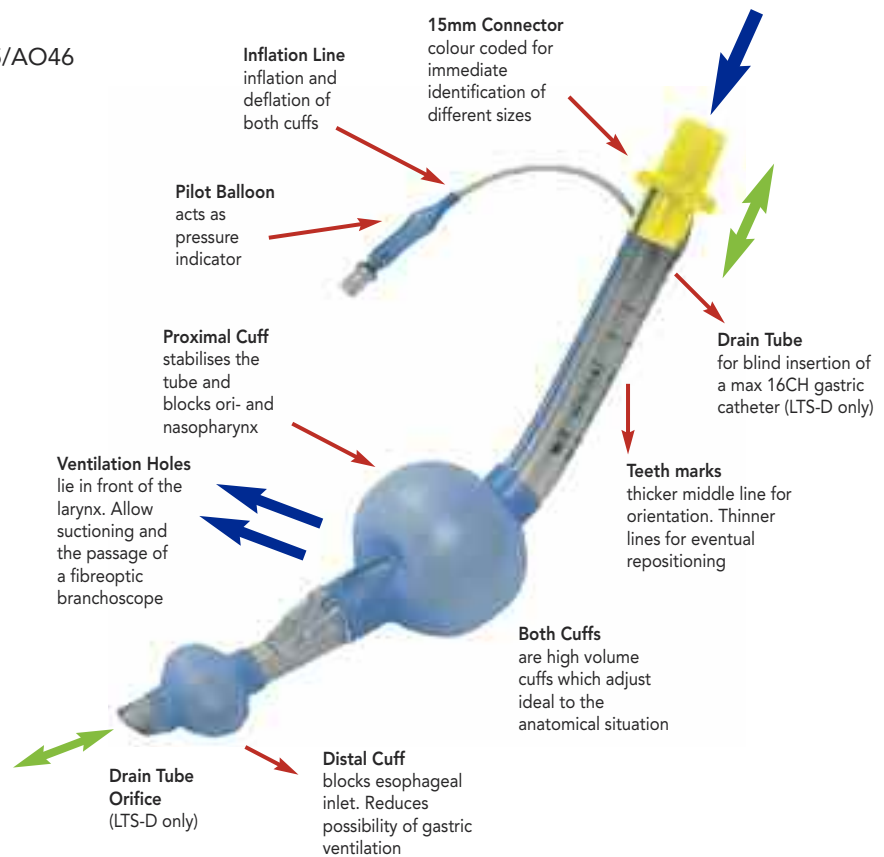

Product Code: AO42/AO43/AO44/AO45/AO46

The Laryngeal Tubes are supraglottic airway devices created as alternatives to tracheal intubation or mask ventilation. They are latex free, and are easy to insert resulting in minimal airway trauma. Both cuffs are inflated from a single source. These airways are designed for positive pressure ventilation as well as for spontaneously breathing patients, thereby allowing maximum versatility as an airway management tool.

Each Kit Includes: airway device, syringe, lubricating jelly, tube tie and quick reference guide.

Disposable Laryngeal Tube (LTD)

Consists of a curved tube with ventilation apertures located between inflatable cuffs. Both cuffs are inflated using a single valve/pilot balloon. The distal cuff is designed to seal the oesophagus, while the proximal cuff is intended to seal the oropharynx. Attached to the proximal end of the tube is a 15mm connector for attachment to a standard breathing circuit or resuscitation bag. Consistently achieves a ventilatory seal of 30cm H₂O or higher.

Disposable Laryngeal Tube with Suction Port (LTS-D)

Similar to the LTD however, the LTS-D features a curved, double-lumen tube with separate paths for ventilation and access to the stomach. The exclusive anatomically-shaped distal tip and cuff assist in the airway's passage behind the larynx and into the normally collapsed oesophagus. Significantly reduces the potential for regurgitation to pass the cuff, thereby reducing the chance for aspiration.

AO42	VBM LT-D Laryngeal tube - size 2	£15.90
AO43	VBM LT-D Laryngeal tube - size 2.5	£15.90
AO44	VBM LT-D Laryngeal tube - size 3	£12.90
AO45	VBM LT-D Laryngeal tube - size 4	£12.90
AO46	VBM LT-D Laryngeal tube - size 5	£12.90

Combitube

Product Code: AO20

Designed for emergency intubation, this airway provides sufficient ventilation whether it is placed in the oesophagus or the trachea. Combitube makes intubation easy, it eliminates the need for a laryngoscope or visualisation of the airway. Combitube comes complete with two inflation syringes and a suction catheter.

AO20(37FR)	Combitube airway - size 37FR	£52.00
AO20(41FR)	Combitube airway - size 41FR	£52.00

Thomas ET Tube Holder

Product Code: AO12/AO12P/AO12Olive

The Thomas ET Tube Holder is the only tube holder with a quick-set screw for a secure hold after tube placement. Not only does the Thomas Tube Holder accommodate Combitubes and LMA's, its special bite block feature protects the patient and the tube. Hook-and-loop padded strap provides security and comfort, and will not stretch or shrink when wet. Colour coded for ease of identification between adult and paediatric versions. Slide stick facilities fast, efficient application of the head strap around the patient's neck without movement of the head. Quick-set screw system securely holds tubes in place and facilities fast, easy adjustment or removal of the Thomas Tube Holder.

- Enlarged tube opening to allow for the use of larger outer diameter single and double-lumen airway tubes (ETT's, LMA's, CombiTubes etc)
- Enlarged mouth access opening for easier suction access and visualisation of the mouth
- Adjusted bite block to prevent biting of the larger outer diameter tubes, and to protect patient's teeth and gums
- New colour branding (Paediatric includes a pink head strap for quick identification in an emergency)

Specify Size: Adult / Paediatric / Adult - Olive

AO12A	Thomas ET tube holder - adult	£3.90
AO12P	Thomas ET tube holder - paed	£3.90
AO12O	Thomas ET tube holder - olive	£3.90

AO12O

Easy Cap® C0₂ Detector

£9.90

Product Code: AO11

For years, hospital and emergency medical services clinicians have relied on Easy Cap® C0₂ detectors to verify proper endotracheal (ET) tube placement. These C0₂ detectors assure you that your patient is intubated properly right from the start and remains that way during transport.

The easy-to-use C0₂ detector attaches directly to the ET tube and responds quickly to exhaled C0₂ with a simple colour change from purple to yellow. Easy Cap® C0₂ detectors are an economical, yet invaluable airway management tool. Whether you're intubating patients in the Emergency Department, the ISU or the field, choose reliable technology from a name you trust.

- Economical yet invaluable airway management tool
- A trusted method for confirming correct endotracheal tube placement
- Assures you that your patient is intubated properly right from the start and remains that way during transport
- Easy-to-use: attaches directly to the ET tube and responds quickly to exhaled C0₂
- Detects exhaled C0₂ levels during intubation for up to 2 hours
- Easy-to-see display window provides constant visual feedback with breath-to-breath response
- Familiar purple-to-yellow colour scheme clinicians have used for years
- Aids assessment of CPR effectiveness

AO11

AO22

Cuffed Endotracheal Tubes

Product Code: AO29/AO30/AO31

Specify Size: 7.0mm / 8.0mm / 9.0mm

AO29	Size 7 cuffed ET tube	£1.85
AO30	Size 8 cuffed ET tube	£1.85
AO31	Size 9 cuffed ET tube	£1.85

AO29

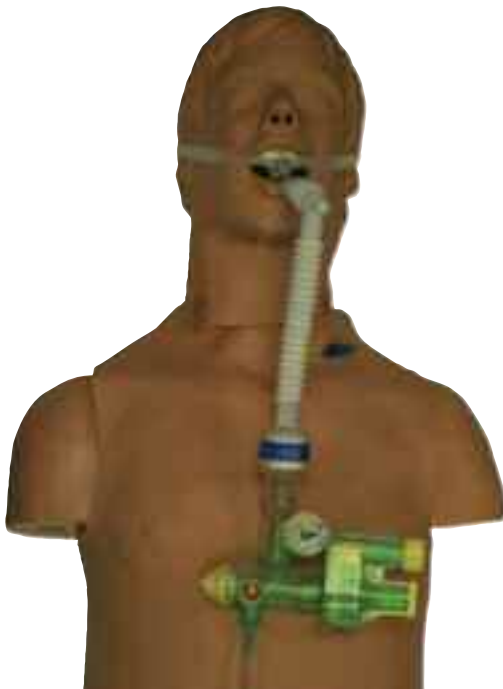

Positube®

£3.84

Product Code: AO22

Inadequate light, loud noises, and other factors can make successful intubation of a patient difficult in the field. Even in a more controlled setting, it's often a challenge to differentiate between the patient's chea and oesophagus. With Positube® you can immediately verify proper placement the endotracheal tube or double lumen airway and oxygenate your patient with complete confidence.

- Oxygenate your patient with the confidence that you have located the tube correctly
- Gives immediate confirmation of ET tube placement
- The 90 angle elbow changes the direction of the pulling motion on the plunger - preventing tube creep
- The clear barrel allows condensation to be visualised
- Cost effective, single use, supplied in individual packs
- Compatible with colourmetric devices
- Compatible with all commonly used BVM's and oxygen circuits

AO47 example of use

Sure Vent 2™ Disposable Automatic Resuscitator

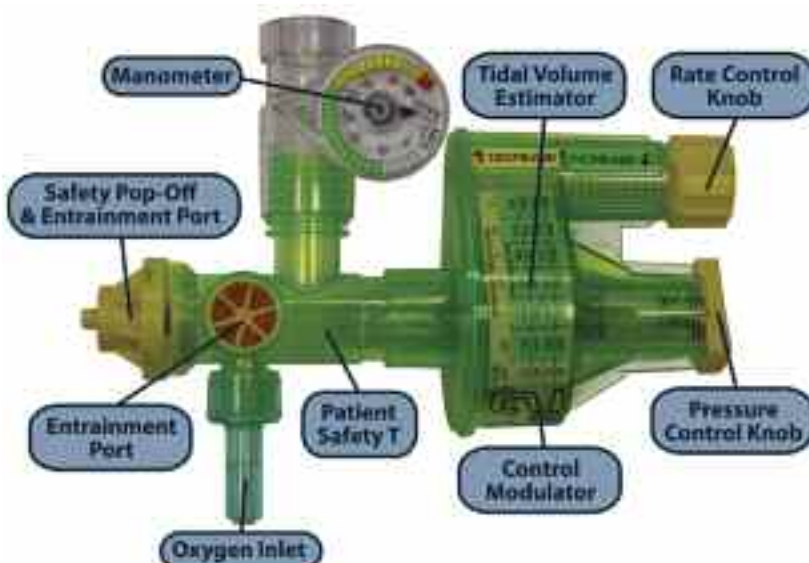

£74.50

Product Code: AO47

The Sure Vent 2™ is a single-patient, multi-use automatic resuscitator providing ventilation support for both breathing and non-breathing patients. It is a constant flow, pressure cycled device designed to provide proper tidal volume, airway pressure and respiratory rate which are critical components of emergency ventilation and resuscitation. Absence of the aforementioned can impact morality and morbidity on a wide range of patients suffering from illness or injury.

The advantage of the Sure Vent 2™, as compared to manual resuscitators, is its ability to deliver consistent and reliable hands-free resuscitation. Manual resuscitators, such as BVM's, may have adverse effects on patients as a result of inconsistent ventilation and undesired levels of Peak Inspiratory Pressure (PIP). The Sure Vent 2™ provides consistent and more efficient ventilation than a BVM and is a force multiplier, allowing the person who would normally be operating the BVM to provide other necessary care to the patient.

The Sure Vent 2™ is precise in its ventilation delivery and provides a level of safety not found when using a BVM. It can also be used during transport without interrupting ventilatory efforts to the patient. Unlike the BVM, the Sure Vent 2™ allows measurements such as tidal volume, rate, and pressure to be adjusted to the needs of each patient. If used with a mask, the Sure Vent 2™ allows the use of both hands to properly affix the mask with a good seal to the patient's face and maintain a proper clear airway with continuous ventilation and optimal gas exchange.

Clinical Advantages

- Provides consistent, more efficient ventilation than a BVM
- Control of delivered volume or pressure
 - Control of delivered rate
 - Ability to administer PEEP
- Reduce hyperinflation, barotrauma
- Minimise aerophagia and aspiration
 - Control over oxygen and carbon dioxide levels
- Lung auscultation can be performed for air entry for ETT position or assessment

Operational Advantages

- Reduces personnel requirements, no one needs to bag patient
- Improves quality of care and reduces risk to patient
 - Reduced chance of extubation
 - Uninterrupted ventilations during movement
 - Safer ventilation
- Lessen risk of vomiting and aspiration
 - Minimal training and expertise to ventilate patients
 - Can be used for ETT and face mask ventilation
- Disposable device, no cleaning or sterilising, maintenance or servicing

AO35

Oxygen Administration Non-Rebreathing Masks

Product Code: AO35/AO36

Allows the delivery of high concentrations of oxygen (up to 85% oxygen at 15ltrs/min). The masks feature a reservoir bag to entrap 100% oxygen. One way valves prevent room and expired air from diluting the oxygen concentration. Supplied with 2.1m tubing.

Specify Size: **Adult / Paediatric**

AO35	Oxygen non-rebreather mask (adult)	£1.09
AO36	Oxygen non-rebreather mask (paediatric)	£1.75

AO37

Nebulising Oxygen Mask

Product Code: AO37/AO38

Supplied with oxygen tubing.

Specify Size: **Adult / Paediatric**

AO37	Nubulising oxygen mask adult	£1.85
AO38	Nubulising oxygen mask paediatric	£1.85

AO39

Venturi Masks

£1.90

Product Code: AO39

Venturi masks mix a specific volume of air and oxygen in order to deliver oxygen concentrations ranging between 24-60%. Useful for accurately delivering low concentrations of oxygen, the valves are colour-coded. Venturi Multi-Mask set includes 1 Venturi mask supplied with oxygen tubing and 6 interchangeable Venturi valves (28-60%) for different concentrations.

Specific Concentration: **24% / 28% / 31% / 35% / 40% / 60%**

AO14

Asherman Chest Seal

£9.10

Product Code: AO14

An innovative sterile dressing for the emergency management of an open pneumothorax and/or prevention of a tension pneumothorax. The Asherman Chest Seal allows paramedics and first response personnel to eliminate unwanted air in the pleural cavity and prevent it from re-entering, dramatically improving a patient's chance of survival. Asherman Chest Seal is also useful in needle thoracentesis where the catheter is left in the chest with the valve placed over it and the hub of the catheter in the mouth of the valve. This facilitates a one way valve for the catheter.

- Circular design - aids conformability and covers the wound
- Pressure sensitive adhesive - ensures quick and efficient application
- Non invasive procedure - less risk to patient
- One way valve - eliminates the intake of outside air
- Incorporates a sterile dressing - cleans and dries the wound area

AO13

Bolin Chest Seal

£18.75

Product Code: AO13

When chest trauma results in a collapsed lung, it is essential that air and blood can escape without being allowed to re-enter. You can trust the Bolin Chest Seal to facilitate this by means of a failure-proof triple valve design that minimises the possibility of tension pneumothorax whilst allowing air and blood to escape while preventing the re-entry of either. Rock-solid adhesion is guaranteed by a thick layer of jell-based adhesive found on the wound-side of the BCS. The adhesive is not only strong enough to seal over body hair and blood, it also allows the BCS to be removed and reapplied to the trauma site if required. The disc is thick enough to prevent wrinkling during application. The 6in rugged polyurethane disc structure can practically cover any size chest trauma.

AO15

Portex Mini Trach II Emergency Kit

£24.00

Product Code: AO15

A simple and quick device to provide an emergency airway with a minimum amount of bleeding.

AO16

Portex Emergency Chest Drain Kit

£42.90

Product Code: AO16

A ready to use kit with 28g (trocar tip) introducer needle and everything you need to carry out an invasive chest drain procedure. The kit is clearly laid out in sterile packaging in order to allow the procedure to be carried out quickly and professionally.

ThoraQuik™ Chest Decompression Device

£55.00

Product Code: AO24

With pneumothorax, a quick response is key to improving patient outcome. Traditional treatment using a large bore cannula or needle is adequate, but using the wrong size or an unsuitable product can lead to unnecessary complications. ThoraQuik™ is designed to overcome these problems, giving you a safe and reliable way to treat pneumothorax.

Simple, Single and Complete

The recommended treatment for suspected tension pneumothorax is immediate needle decompression, but typical needles used are 3-6cm long and are not always long enough to reach the pleural space. ThoraQuik™ has a large bore 10cm needle ensuring success in reaching the pleural space and minimising the risk of catheter occlusion once it is found. Internal diameter of catheter 3.12mm - 3.22mm.

- Efficacious treatment designed for arduous pre-hospital environment
- Secure, and avoids the risk of an open air passage
- Unitary design, use straight from pack, place with one hand

AO24

Chest Decompression Set

£18.50

Product Code: AO23

Contents:

- 4x PVP swab & stick
- 6x sterile 4" x 4", 2 pair surgeon's gloves
- 2x 20 cc syringe w/slip lock
- 4x 14 gauge x2" IV catheter
- 2x K52 stopcock

AO23

Rusch Quick-Trach®

£105.95

Product Code: AO49

The Rusch Quick-Trach® Emergency Cricothyrotomy Kit allows quick and safe access for ventilation in the presence of acute respiratory distress with upper airway obstruction. A removable stopper reduces the risk of damage to the rear wall of the trachea. A conical needle tip guarantees the smallest necessary stoma and reduces bleeding. The syringe allows for the identification of the trachea by aspirating air. The kit is ready to use and consists of a pre resemble emergency cricothyrotomy unit with a 10ml syringe attached to a padded neck strap and a connecting tube. This single-use kit is sterile and latex-free.

AO49

TPAK Chest Decompression Needle

£16.05

Product Code: AO51

The 14 gauge TPAK chest decompression needle is in the recommended 3.25" length for treating a tension pneumothorax. You can't count on a standard IV catheter to needle a chest deeply enough in needle thoracostomy. Our 14 gauge x 3.25" TPAK chest decompression needle is a compact, reliable solution for treating a tension pneumothorax. Shock resistant case ensures the needle/catheter is secure upon deployment, and the capless flash chamber gives instant confirmation of needle placement in prehospital needle thoracostomy. TPAK comes in a rugged case, with a textured, easy-open hex cap. 14 gauge x 3.25" chest decompression needle. Strong, reliable tension pneumothorax needle allows for secure placement of catheter for continuous relief during needle thoracostomy. Rugged tube with textured, easy-open hex cap. Capless flash chamber for instant confirmation of needle placement. Convenient, compact size for maximum portability. Shock resistant, precision dimensioned case and needle hub ensure that chest decompression needle and catheter secure upon deployment for safety.

AO51

AO05

Suction-Easy Disposable Suction Unit

£19.10

Product Code: AO05

This compact, powerful suction unit is designed to effectively evacuate the oral pharynx in emergency situations. It is small enough to fit inside a first-in bag or carried in a pocket by the user. It has a bulb designed to provide a vacuum force of approximately 100mmHg. Generated by the "rebound" of the bulb after each squeeze, contents are expelled into a collection bag attached to the outlet port. The bag and bulb hold well over 1000cc's. For convenience in disposal, the unit is also packaged in a bag with a two part label so the user can peel off the top layer to expose the biohazard warning.

AO48

Vitalograph Emergency Aspirator

£139.00

Product Code: AO48

The Vitalograph Emergency Aspirator offers outstanding handheld portable suction for most emergency situations and is capable of producing a maximum vacuum of 450mmHg. All parts of the unit may be cleaned and cold sterilised and each unit is supplied complete with 9mm and 6mm catheter mounts, a 9mm catheter and instructions.

AO50

Nitronox (Entonox) Kit

£265.00

Product Code: AO50

Designed around the need of today's emergency and healthcare services for a technically superior portable pain relief delivery system that conforms and in many cases exceeds all relevant BS and international standards. High performance, durability and ease of operation has been engineered into the lightweight, robust units along with exceptional reliability. Trouble-free and almost maintenance free, the new PRU's just keep on going, delivering dependable controlled operation in the most demanding conditions, whenever and wherever you need it.

Contents:

- 1x Barrel bag
- 1x Oxylite PRU demand valve, hose and probe
- 5x Disposable mouthpieces
- 1x Disposable adult facemask
- 1x Viral filter

EZ-10[®] Intraosseous Infusion System

Product Code: IV03

The EZ-10[®] Intraosseous Infusion System is a complete solution for immediate vascular access - whether you're facing difficult vascular access challengers or need immediate intraosseous access for critical situations and life-threatening emergencies. EZ-10[®] provides the medical professional immediate vascular access to the central circulation within seconds, delivering medications, intravenous fluids and blood products to adult and paediatric patients alike. With a specially designed cutting IO needle and small power driver, the EZ-10[®] allows the clinician complete control - avoiding the use of force. EZ-10[®] provides rapid, smooth entry into the bone's medullary cavity, creating an immediate conduit to the central circulation. The EZ-10[®] Intraosseous Infusion System is the leading choice for intraosseous access across multiple health care settings.

EZ to use, EZ to train and EZ to maintain, EZ-IO[®] is the preferred choice of intraosseous access for medical professionals and the best method for gaining immediate vascular access...when you need it.

Bone Injection Gun (B.I.G.)

Product Code: IV11

The world's first automatic, user-friendly IO device brings you safe, rapid IO access for the delivery of fluids and medications at flow rates similar to peripheral IV infusion. With the help of B.I.G. IO infusion can be established in less than 60 seconds. B.I.G.'s spring-loaded needle mechanism delivers accurate and consistent results.

The Bone Injector Gun offers minimal risk of complications with NO direct contact with the patients blood. The B.I.G. does not require drilling or an external power source.

The B.I.G. presents an easy and safe "position and press" mechanism. Typically used at the upper tibia plateau, the technique is simple to learn through brief training. B.I.G. is rapidly becoming the device of choice for physicians and paramedics in emergency medical services, hospitals, militaries, government agencies, and tactical environments.

- Disposable automatic spring loaded trocar needle
- Safe, reliable & usable in extreme conditions
- FDA (Adult & Paediatric) & CE approvals
- Completely mechanical, no need for an energy source
- Ready to use, no maintenance required

IV25

Fast1® Intraosseous Infusion System

£96.00

Product Code: IV25

Chest Is Best™ Sternal IO is the quickest route to the heart. The fact is, not all IO is clinically equal. Sternal IO delivers drugs to the heart 2 - 3 times faster and in higher therapeutic concentrations than tibial IO.

Specifically designed for use in demanding, emergency environments, it is the quickest, safest and most effective IV alternative for the delivery of drugs and fluids to the heart. Fast1® is used extensively by defence departments, emergency medical services, and hospitals around the globe.

Fast: Fluids to the heart in seconds

Simple: Success rate of over 95%

Effective: For concurrent use with other procedures

Safe: Minimises cross contamination

DI01

Adscope™ Lightweight Stethoscope

£15.25

Product Code: DI01

Lightweight version of the 603, the 609 is constructed primarily of aluminium alloy for incredible wearing comfort. Non-chill bell and diaphragm rims. Adsoft™ eartips, spare diaphragm, and scope ID tag included.

DI07

Finger Pluse Oximeter

£34.00

Product Code: DI07

This Finger Pluse Oximeter is a small, lightweight and portable device suitable for use with either adults or children.

- Simple and convenient one button operation
- SpO₂%, PR and Pleth waveforms are displayed on screen
- SpO₂%, Range: 70-99%
- Pulse Range: 30-235bpm
- Option of displaying the Pleth waveform in two formats
- The display can be easily rotated to display in 4 directions
- Clear OLED colour display
- Compact and lightweight (only 50g with batteries!)
- Low power - Continuous operation for up to 20 hours
- Adjustable brightness of background light (10 levels)
- Low power consumption (2 x AA Batteries included)
- Signal strength indicator

DI14

Piccolight E56 Diagnostic Set

£155.00

Product Code: DI14

Combining fantastic quality and great value, the kaw Piccolight® E56 Diagnostic Set provides everything expected from a diagnostic set at a price that's affordable. With a choice of 4 colours and housed in a convenient hard carry case, the Piccolight E56 is ideal for a general practitioner, practice nurse or trainee.

- Supplied in hard carry case
- Piccolight® Fibre Optic Otoscope with 3x magnification with intensive Xenon Lamp
- 20 Disposable ear specula (2.5mm and 4.0mm - 10 of each supplied)

DI08

Piccolight Diagnostic Set

£59.15

Product Code: DI08

Contents:

- 1x Piccolight E50 Ophthalmoscope head
- 1x Piccolight C Otoscope head
- 1x Battery handle
- 10x Disposable ear funnels (2.5mm)
- 10x Disposable ear funnels (4.0mm)
- 1x Fabric bag

DI19

Blue Sensor Defibrillator Electrodes

£13.50

Pack of 50

Product Code: DI19

Blue Sensor's unique offset concept helps maintain a stable, uninterrupted signal even if the lead wire is pulled, thus eliminating movement artefacts. Moreover, the offset connector reduces uncomfortable direct pressure on the patient when attaching cables and prevents gel from being squeezed out onto the adhesive surface. The adhesive itself is both skin-friendly and ultra high tack, so electrodes remain in place even when the patients are sweating. Sensors are silver/silver chloride and the special wet gel provides rapid reduction of skin impedance, which helps avoid baseline drift to ensure a correct ECG the very first time. Adult foam back.

AED & Defibrillation

Lifepak® CR Plus Defibrillator
Product Code: DE01

LIFEPAK®

DE01 example of use

DE03

DE05

DE06

Featuring the same advanced technology trusted by emergency medical professionals-yet simple to use-the Lifepak CR Plus automated external defibrillator (AED) is designed specifically for the first person to respond to a victim of sudden cardiac arrest (SCA). Unlike AEDs with complex prompts and limited energy for defibrillation, the fully automatic Lifepak CR Plus AED combines an easy two-step operation, just the right level of guidance, and the capability to escalate to 360 joules when needed.

DE12

DE15

DE16

- Designed for and tested by emergency professionals
- An advanced and rugged basic life support device, which gives you the power and flexibility for optimum patient care
- Loud voice prompts and lighted buttons to guide you
- Large LCD screen displaying graphics and text for quick reference can be seen from any angle and in bright sunlight
- Pre-connected electrodes that help speed your response when every second counts
- Paediatric therapy can be easily provided using the infant/child reduced energy defibrillation electrodes
- cprMAX™ technology eliminates the 'hands off' charge time delay in AED mode through background charge features thus maximising hands on time and enables care providers to change protocols as standards of care evolve
- With the manual override option you can decide when to analyse and shock with the touch of a button
- Built-in-flexibility allows the Lifepak® 1000 to be programmed for use by first responders or professionals
- High capacity battery to provide the power for up to 440 shocks or approx 17 hours of monitoring time
- ECG monitoring via electrodes
- Supplied complete with Lifepak® 1000 Defibrillator, Ambu® Res-Cue Mask® first responder kit, non-rechargeable battery, one pair of adult Edge System™ electrodes with Quick-Combo™ connector and Redi-Pak™ pre-connect, soft carry case, user guide and quick reference guide

Lifepak® 15 and the full range of accessories are now available.

Physio-Control defibrillators have set the standard for over 55 years, and the enhanced Lifepak® 15 monitor/defibrillator raises the bar. As their most advanced emergency response monitor/defibrillator, the Lifepak® 15 device balances sophisticated clinical technologies and supreme ease of use in a device that's tough enough to stand up to your most challenging environments. Evolving from its original platform, the Lifepak® 15 adds new features - temperature monitoring and external power - to complement existing features which include 360J energy and 12-lead ECG transmission. And that means your team can be even more effective.

The pioneer in portable defibrillation and monitoring technology, physio-Control is committed to creating technologies and devices that change the way you provide emergency care. You can see the results in the enhanced Lifepak® monitor/defibrillator, which sets a new standard in innovation - yet again.

Call us to discuss all the available options/accessories and prices.

Physio-Control True CPR

Product Code: DE55

LIFEPAK®

Respond with TrueCPR Coaching Device from Physio-Control.

TrueCPR helps your team optimize their manual CPR performance with the real-time feedback they need on the most critical resuscitation parameters. Created by Physio-Control, a leader in lifesaving technology for more than five decades, TrueCPR is the only coaching device that can be used in conjunction with any defibrillator to measure actual chest compression depth. And, unlike accelerometer-based products which overestimate chest compression depth on compliant surfaces, TrueCPR delivers accurate CPR depth measurement through our propriety Triaxial Field Induction (TFI) technology.

The result is a clearer picture of resuscitation performance-during compressions, after CPR, and in post-event review-and the power to help improve it for the future.

Prompt. Effective. Consistent, with minimal interruptions. That's the level of CPR every responder and clinician wants to deliver. It's also a major focus of the 2010 AHA Guidelines and ERC Guidelines, which recommend developing a culture of high-quality resuscitation and quality improvement, including measurement, benchmarking, and establishing a feedback loop for response teams. TrueCPR can be a vital part of your improvement efforts, providing critical feedback for assessing CPR quality both during and after a resuscitation event.

DMAC 15 Medical Kit

Product Code: DMAC 15

At Medipro we are one of a few centres who have the ability to teach the diver medic course approved by IMCA.

The DMAC 15 kit has been designed to meet the most demanding offshore environment and medical needs. The main case is made of (LLDPE) polyethylene impact resistant and UV stabilised material; known for strength and durability, airtight and water proof with solid stainless steel latches and hinges that will withstand any harsh shipping conditions.

The medical equipment and accessories has been configured in accordance with IMCA DMAC 15 Rev 3 Guidelines. It comes with a total of four individually packed boxes of medical equipment items: -

- Equipment to be held in diving bell
- Bandages and dressing
- General diagnostic equipment & procedures
- Resuscitation and airway management procedures

The layout and packaging of each pack has been designed for ease of usage and transportation.

The DMAC 15 Medical kit can be provided as a complete package in accordance with DMAC 15 Rev 3 (Subject to local drug restrictions) and/or complete with AED, O2 provider equipment and ambu bag.

Chamber Case
side view

Chamber Case

Prices exclude VAT and carriage

Equipment to be held in a diving bell

Are to be stored in a watertight bag or container. The equipment should be available for rapid use in each living chamber of a saturation system and in air diving chambers. In 'living' chambers a foot or gas powered suction pump may be preferred. The watertight bag is not required within dry 'living' chambers and it is acceptable that this equipment is stored outside the system ready to be passed in immediately as required.

Diving Bell Case

The hyperbaric evacuation system HE'S compartment needs to have sealable vomit, metabolic waste bags that allow for same fluid containment and disposable. Absorbeze Maxi Sick Bags are recommended. Consideration should also be given to the number of occupants and possible time expected before retrieval. A minimum of 5 occupants per 24 hours is required. Given the confines of the evaluation unit and the potential for contamination, anti diarrhea preparations such as imodium should be considered.

Fluid replacement supplies which can be primary water, to allow approx 100-150mls per man per hour, must be available. Rehydration preparations to maintain electrolytic balance should also be considered as essential to augment the fluid balance of both the dive and the surface crew.

FA32

FA32 example of use

Traumafix® Dressing

Product Code: FA32/FA33/FA34/FA40

TraumaFix® is a new dressing that offers a substantial, highly absorbent dressing pad, capable of absorbing over ten times its own weight in fluid. A pressure bandage allows direct pressure to be applied quickly and maintained easily, this is secured instantly with a Velcro style fastening. This new dressing overcomes the limitations of traditional methods such as ambulance dressings which are often not substantial enough to deal with the bleed and have no method to apply adequate pressure. Alternative larger dressings also take longer to apply with a suitable pressure bandage. Multiple major bleed injuries can be stemmed quickly, allowing the casualty to be moved easily. The dressing is a significant advance in the treatment of trauma injuries.

- Highly absorbent non-adherent wound pad
- High pressure bandage
- Super-fast application, quick-fix Velcro style fastening
- Sterile

FA32	TraumaFix dressing (10x18cm pad)	£2.10
FA33	TraumaFix Military dressing (10x19cm pad)	£2.46
FA34	TraumaFix Military dressing (20x19cm pad)	£3.75
FA40	TraumaFix dressing (15x18cm pad)	£2.85

FA06

The Emergency Bandage

Product Code: FA06/FA07

A new device for the staunching of blood flow from traumatic haemorrhagic wounds in pre-hospital emergency situations. The product consolidates many first aid devices such as primary dressing, secondary dressing and tourniquets into one unit. The product is so easy to use that even an injured person can apply the bandage with only one hand. Also available in new 8" abdominal size.

FA06	Emergency trauma dressing 6" single	£5.75
FA07	Emergency trauma dressing 8" single	£9.85

FA41

CAT Tourniquet

£18.98

Product Code: FA41

The Combat Application Tourniquet (CAT) is a small and lightweight one-handed tourniquet that completely occludes arterial blood flow of an extremity in the event of a traumatic wound with significant haemorrhage. True circumferential pressure is provided to the extremity via the windpass system system with a free moving internal band that the CAT incorporates. Once tightened, the windlass is locked in place when bleeding has ceased. The CAT also has a Velcro Windlass Strap for further securing of the windlass during patient transport. Can be stored easily on the side of your belt.

FA08

CELOX™

Celox™ Haemostatic Agent

Product Code: FA08/FA39

Celox™ granules are the first in a new generation of emergency haemostatic agents. They are simple to use and highly effective. Celox™ granules quickly control even the most severe arterial bleeding. Just pour it in, pack it, and apply pressure. No specific training is required. Celox™ clots blood fast, works in hypothermic conditions and also clots blood containing Heparin or Warfarin. Celox™ does not generate heat in use and won't burn. Celox™ is safe to use for the entire body including head, neck and chest wounds. Importantly Celox™ can be used instantly and without hesitation as a fast, safe and simple emergency treatment for serious bleeding. For yourself or for others, on the job, on the battlefield, or in the home, Celox™ is an easy, quick way to reduce blood loss and save lives.

FA08	Celox gauze	£30.00
FA39	Celox applicator system	£17.50

FA39 example of use

FA43 example of use

iTClamp™

£60.00

Product Code: FA43

The iTClamp™ is an innovative solution for severe haemorrhage – a leading cause of preventable death in traumatic injury – that controls bleeding in seconds. The iTClamp™ seals the edges of a wound closed to create a temporary pool of blood under pressure, which forms a stable clot that mitigates further blood loss until the wound can be surgically repaired. It applies easily & controls bleeding in seconds.

The iTClamp™ combines a simple concept with a highly-reliable, incredibly-efficient device that can be easily applied. This innovative technology has practical applications in numerous trauma-focused industry segments including:

- First Responder
- Police
- Fire and Emergency Medical Services
- Emergency Department
- Military Hospital and Battlefield

Fast: stops bleeding in under 5 seconds

Effective: pre-clinical trials show significant improvement in survival, survival time and blood loss

Easy: anyone can use; intuitive and can be self applied

Apply Anywhere: can be used in junctional areas, scalp, face with one or multiple devices

Pain: brief needle poke

Selective Control: stops bleeding at point of injury but allows flow to distal extremity.

FA43

FA29

Burn Film Dressing

£2.88

Product Code: FA29

A cost-effective and widely approved burn dressing. A simple and effective treatment widely used by Ambulance Staff and A&E departments worldwide. This simple to use product prevents loss of moisture yet is compatible with many other burn treatments including Waterjel. An optional wall mounted dispenser is also available.

FA01

Burnshield®

Product Code: FA01/FA02/FA30/FA31

Burnshield®, when applied to burn wounds, preferably as soon as possible after the burn, has the tremendous ability to absorb and dissipate heat, providing relief, minimising shock and skin damage, halting the burn process and physically protects against further contamination. Burnshield's specially formulated Hydrogel, which is non-toxic and non-irritant, provides a cooling and soothing effect that with a single application, is an effective first aid measure in the acute burn.

For immediate use on burns and scalds, Burnshield® blankets and dressings features are:

- Sterile-bacteria static
- Suitable for use on most burns and scalds
- Non-toxic
- Non-irritant
- Cools and moistens the burn area
- Physical protection against contamination
- Minimises skin damage
- Inhibits the burn's progression
- Non-adherent and easy to remove
- Covered in water soluble gel
- Elastic and able to stretch and flex
- Versatile and innovative
- Portable
- Available in a variety of sizes
- An effective after-sun care in the form of solace
- Stable gel structure

FA01	Burnshield dressing (100x100) single	£3.25
FA02	Burnshield dressing (200x200) single	£6.25
FA30	Burnshield dressing limb (50x1000)	£6.25
FA31	Burnshield dressing - face mask	£14.75

FA46

Blue Nitrile Examination Gloves

Product Code: FA46

Beaded cuff, ambidextrous gloves with high tensile strength and optimum sensitivity.

- Non-sterile
- In accordance with EN455 (1/2). AQL 1.5
- Powder Free
- Latex Free (Nitrile)
- Box of 100

FA46S	Small	£5.50
FA46M	Medium	£5.50
FA46L	Large	£5.50
FA46XL	Extra Large	£5.50

FA45

Black Tactical Examination Gloves

Product Code: FA45

These Tactical Black Nitrile Examination Gloves are very popular with various Police Forces, military medics, security personnel and door personnel. The ultra sensitive, powder and latex free, black nitrile gloves are medical grade single use gloves that conform to BS EN455. Synthetic rubber offers better puncture and abrasion resistance than natural rubber or vinyl. A textured finish improves grip while a rolled cuff provides additional strength and helps prevent the roll back of liquid.

- Ultra Sensitive
- Beaded cuff
- Powder free
- Non-sterile
- Protein free
- Ambidextrous
- Single use
- Medical Grade & Conform to BS EN455
- AQL 1.5
- CE Marked

FA45S	Small	£4.95
FA45M	Medium	£4.95
FA45L	Large	£4.95
FA45XL	Extra Large	£4.95

FA44

Purell Hygienic Hand Gel (individual) **£1.90**

Product Code: FA44

- Kills 99.99% of most common germs that may cause illness
- Works in as little as 15 seconds, without the need for water or towels
- Specifically formulated with moisturisers to leave hands feeling soft
- Conforms with BS EN1500, EN1275, EN12054, EN104

TC320 PMR446 - No licence required

Product Code: CO98

Frequency Range

446.00625 - 446.09375 Mhz

Features

- Monitor
- Battery save
- Low battery alert
- Time-out timer
- PC programmable
- Wired clone
- CTCSS/CDCSS
- Channel scan
- Battery indicator
- Voice operated transmit (VOX)
- Busy channel lockout
- Scrambler option

Standard Package Comprises of:

- Radio unit
 - Antenna
 - Belt clip & strap
 - User manual
 - 1700mAh Li-Ion battery
 - 24 months radio body warranty
- *plug in rapid charger

PD785

Product Code: CO03

Frequency Range

UHF: 400-470Mhz

VHF: 136-174Mhz

Features

- Up to 1024 channels
- Channel Spacing: 12.5/20/25KHz
- Channel scan supporting mixed mode scanning (analogue & digital channel)
- Supports global positioning system (GPS) (PD785G only)
- Digital voice call function
- Digital text message function (pre programmable message & editable message)
- Remote monitor
- Stun/revive
- Call alert
- Man down (PD785G)
- Lone worker
- Basic scrambler & encryption
- Advanced encryption
- Pseudo trunk operation (DMO&RMO)
- Multi-site roaming
- Supports option board interface
- Channel change voice notification
- 5 tone, HDC1200, 2 tone signalling selectable (in analogue mode)
- Analogue & digital DTMF
- One touch call/text message/supplement services
- Telemetry
- Home screen dial
- Multi language menu display
- Vibration
- Power on & off user logo programming
- Remote monitor
- MPT1327 & DMR tier III compatible
- Analogue & digital emergency

RD965

Product Code: CO80

Product Description

- IP67 Protection
- This device can operate properly under full immersion test
- Slim & portable device measuring only 42mm and less than 5kg in weight

Features

- 100% continuous duty cycle from 1W to 10W
- Supports two simultaneous voice paths in digital mode
- Supports operation in analogue & digital mode with auto detection between analogue mode & digital mode
- Supports optional internal mini duplexer (see accessories)
- IP site connect (digital mode only) (optional)
- Supports optional external 10Ah Li-Ion battery offering at least 8 hours on a 50% duty cycle at high TX power
- Remote diagnostics, alarms & control (RADC)
- External power supply - emergency port on battery

Standard Package Comprises of:

- Radio unit
- Power cord
- Adapter
- Fuse
- 24 months transceiver warranty
- User manual

CO90

RD985

Product Code: CO90

Features

- 16 channels
- 100% continuous duty cycle from 5W to 50W
- Supports two simultaneous voice paths in digital mode (pseudo-trunk)
- Auto detection between analogue mode & digital mode
- IP site connect (digital mode only)
- Four programmable keys to improve ease of use & increase operator efficiency
- Advanced heat sink design with thermal - controlled cooling fan ensures reliability during extended use
- Supports integral duplexer with hytera integral duplexer installation kit (non-RoHS compliant)
- Supports operation in analogue & digital mode
- Remote diagnostics alarms & control (RADDC)
- Power-on user logo programming
- Multi-language menu display
- Multiple CTCSS/CDCSS in analogue & mixed channel

Standard Package Comprises of

- Radio
- Power cord
- User manual
- 24 months warranty on transceiver

Zycomm Alertz

Product Code: CO96/CO97

Zycomm Alertz offers both an alarm to text interface and email gateway allowing both alarm messages and emails to be sent direct to Hytera display radios. Connect Alertz to the serial output of an alarm panel and connect direct to Hytera display radios. Connect Alertz to the serial output of an alarm panel and connect direct to a Hytera MD785 using a PC40 cable to offer seamless messaging direct to display radios.

- Email to text message
- Alarm panel to text message
- Alertz supports common alarm formats
- Alertz alarm keyword matching
- Alertz alarm keyword destination routing
- Alertz email radio destination routing
- Alertz+ adds Hayes AT support for additional systems such as B.M.S. building management
- Web browser configuration
- 9-18VDC operation

CO96

Hytera Smart Dispatch Software

Product Code: CO95

Features

- On-line/off-line status reporting
- Remote monitoring
- All types of voice call
- Radio kill & radio activation
- Multiple mappings support
- GPS positioning
- Real-time tracking
- Location history and route playback
- Regions and geofencing
- Text messaging
- Offline messaging
- Emergency alarm
- Voice recording & playback
- Reporting and statistic
- Phone interconnect
- AudioLink
- Dispatcher intercom
- Email gateway

TK-2312E/TK-3312E

Product Code: CO116

Product Description

- Licenced radio
- IP54 / IP55 protection
- US-MIL-STD 810C/D/E/F/G
- Slim & light weight

Features

- Wide band coverage (38MHz VHF, 70MHz UHF)
- 128 channels/128 zones
- Programmable channel spacing (25/20/12.5 kHz)
- Built - In DTMF & QT/DQT
- FleetSync & 5-tone signalling
- MDC-1200 signalling
- Emergency key
- Remote stun function
- 9 programmable function keys
- Built-in VOX
- Built-in voice inversion scrambler
- Priority scan
- Electronic serial number (ESN)
- Clear sound with voice compander function

Standard Package Comprises of:

- KBH-10 belt-clip
- Users' manual (English, Spanish, German, French, Dutch, Italian, Turkish and Greek)

PLEASE NOTE THIS DOES NOT COME WITH CHARGER, BATTERY & ANTENNA

TK-2360/TK-3360

Product Code: CO162

Product Description

- Licenced radio
- Slim and light weight
- IP54/IP55 protection
- US-MIL-STD 810C/D/E/F

Features

- 16 Channels - mechanically selectable down To 12, 8 or 4
- Wide band coverage (38MHz VHF, 70MHz UHF)
- Programmable channel spacing (25/20/12.5 kHz)
- Built-in DTMF & QT/DQT
- FleetSync & 5-tone signalling compatible
- Emergency key
- Lone worker
- Man down with pre-settable "panic/stationary" parameters
- Advanced motion detection (by software license)
- Remote stun function
- 3 Programmable function keys
- Built-in VOX
- Built-in voice inversion scrambler
- Priority scan
- Electronic serial number (ESN)
- Clear sound with voice compander function

Standard Package Comprises of:

- KBH-12 belt-clip
- Users manual (English, Spanish, German, French, Dutch, Italian, Turkish and Greek)

Product Description

- Licenced radio
- IP54 dust and water resistant
- Rugged construction
- MIL-STD 810 C/D/E/F

Features

- Wide band coverage (136 - 174 or 400 - 470 MHz)
- Practical channel capacity (16 channel/2 zone)
- D - sub connector - 15 - pin interface programmable as 8x ports
- FleetSync® compatibility
- QT/DQT/DTMF signalling
- MDC-1200 signalling compatible
- Note - requires license upgrade
- Stun/revive
- Voice annunciation in 8 languages
- GPS internal/external options
- Built-in voice inversion scrambler
- Voting function
- Priority scan
- Emergency key & lone worker function
- Enhanced kenwood audio

Standard Package Comprises of:

- Users manual (English, Spanish, German, French, Dutch, Italian, Turkish and Greek)
- Mounting bracket
- DC cable

- High visibility dot matrix display (12 character alphanumeric display)
- Extra large channel capacity (512 channel/128 zone)
- Enhanced kenwood audio
- FleetSync® compatibility
- 5 tone signalling
- Lone worker function
- GPS ready (NMEA0183 compatible)
- Voice inversion scrambler
- Transparent data mode for data exchange capability
- Dual priority scan
- Remote control head (OPT.)

Standard Package Comprises of:

- Users manual (English, Spanish, German, French, Dutch, Italian, Turkish and Greek)
- Mounting bracket
- DC-cable

TK-7189 / TK-8189E FM Transceiver

Product Code: CO254

Product Description

- Licenced radio
- Rugged construction
- IP54/IP55 protection
- MIL-STD 810 C/D/E/F

CO254

Features

- Wide band coverage (136-174 MHz) (400-470 MHz)
- High visibility dot matrix display (12 character alphanumeric display)
- Extra large channel capacity (512 channel/128 zone)
- Enhanced kenwood audio
- FleetSync® compatibility
- 5 tone signalling
- Lone worker function
- GPS ready (NMEA0183 compatible)
- Voice inversion scrambler
- Transparent data mode for data exchange capability
- Dual priority scan
- Remote control head (OPT.)

Standard Package Comprises of:

- Users manual (English, Spanish, German, French, Dutch, Italian, Turkish and Greek)
- Mounting bracket
- DC-cable

TKR-750/850 TKR-751/851 REPEATER

Product Code: CO256

Product Description

- Repeater

Features

- Repeat mode & internal controller
- Multi-tone/code tables & DSP processing
- Die-cast chassis body
- Auxiliary macro ports
- Continuous duty/high stability RF power output
- 16 Channel simplex/full - duplex base mode & priority scan
- Flash memory advantage
- Wide/narrow emission capability
- PC programming & tuning
- Local speaker & microphone
- Companded audio
- 6 Programmable keys
- Cooling fan
- Battery backup & power saver

NX-200/NX-300 VHF/UHF Digital & FM Transceiver

Product Code: CO265

Product Description

- IP67 (IP54/55 on 'S' version) water/dust intrusion
- Rugged construction
- MIL-STD 810 C/D/E/F

Features

- 4/5W output power
- 14 character alphanumeric LCD **
- Extra large channel capacity (512 channel/128 zone) **
- NXDN™ digital air interface
- AMBE+2™ VOCODER
- 6.25 & 12.5 kHz channels (digital)
- Digital conventional/trunking mode
- Transparent data features
- Voice guide option
- FM conventional mode
- LTR® trunking mode
- FleetSync® compatibility **
- DTMF encode/decode
- Emergency call/lone worker features
- Easy option port
- NXDN™ digital scrambler
- Variety of scan features

** Not available on all models

Meet Analogue & Digital ETSI European Standard R&TTE Standard:

- EN 300 086, EN 300 113, EN 300 219, EN301 489

NX-220E/NX-320E VHF/UHF Mid-Tier Digital & FM Transceiver

Product Code: CO292

Product Description

- Rugged construction
- MIL-STD 810 C/D/E/F/G
- IP54/55 protection

Features

- 5W output power
- Large channel capacity (NX-220E/320E 260 channels)
- NXDN™ digital air interface
- AMBE+2™ VOCODER
- 6.25 & 12.5 kHz channels (digital)
- Digital conventional/trunking modes
- Transparent data features
- FM conventional mode
- FleetSync/FSII® compatibility
- DTMF encode/decode
- Emergency call/lone worker features
- Man Down™ motion sensor, with optional panic/stationary modes
- NXDN™ digital scrambler
- Optional telephone interconnect via KTI-4
- Variety of scan features (some screen/key based functions not available on the "E3" version radios)

Meet Analogue & Digital ETSI European Standard R&TTE Standard:

KAS-10 Version 3 NEXEDGE & FleetSync® AVL & Dispatch Messaging Software

Product Code: CO334

Features

- GPS AVL & dispatcher software for digital NEXEDGE & analogue radios
- V3 adds NEXEDGE virtual radio IP dispatch (trunking mode only)
- Uses customers' own maps (jpg/bmp) or optional
- Microsoft® MapPoint® 2006/2010 mapping
- Uses customers' own WAV files for special alerts
- FleetSync messaging & automatic vehicle location (AVL)
- NEXEDGE digital messaging & AVL
- NXDN conventional & trunked operation
- MDI (multiple document interface) window
- 999 mobile IDs
- Windows XP, vista & W7 compatible
- Extensive logging, reporting & warning functions
- VoIP dispatch requires V2.5 NXR repeater firmware & V2.5 KPG-110SM software or later
- Free upgrade from earlier KAS-10 versions
- NOTE - voIP dispatch requires KSGPC50001 USB DV module

KAS-10 VERSION 3 Price List

CO334	Fleetsync PC windows software for NEXEDGE & Analogue radios	£247.50
CO335	Digital vocoder module for CO334 VoIP dispatch	£378.00

KAS-11

Image Viewer Software

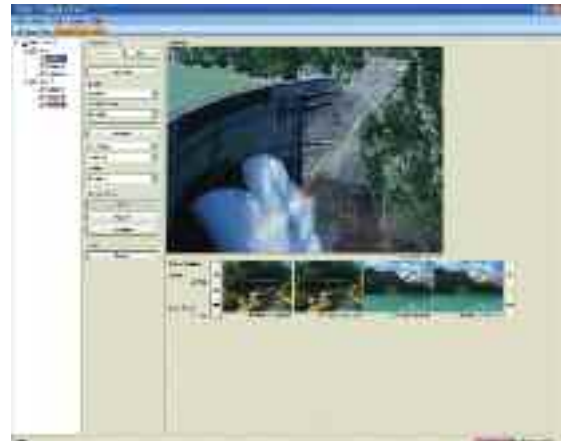

Product Code: CO336

Features

- PC application software
- Runs in Windows XP (SP3) Vista & Windows 7
- Requires pentium III 1GHz or higher
- Selects camera, requests. Polls images
- Displays, saves, logs & exports images
- Fully password protected
- Requires KVT-11 image encoder

KAS-11 delivered with

- Basic operations PDF in English
- Installation guide in English
- User manual (English, French, Spanish, German, Dutch, Italian, Turkish & Greek)

KTI-3M

Network Interface Unit for the NXR-710/810

Product Code: CO337

Features

- Enables conventional IP network function on NEXEDGE systems
- Can be installed inside the NXR-710/810 or used free standing
- IP network protocol is also compatible with NXR-700/800
- Supports 10base-T & 100base-TX ethernet
- Upgradeable firmware & FPU settings via remote IP access (future option)

EU EMC Standard: EN 61000-6-1 & EN 61000-6-3

EU Safety Standard: EN 60065 & EN 60950-1

KTI-3 Delivered with:

- Sync cable (1m)
- Users manual (English, Spanish, German, French, Dutch, Italian, Turkish, Greek & Russian)
- Cushion pads - 1x large & 4x small

Telephone Interconnect Adaptor for NEXEDGE Repeater

Product Code: CO308

Features

- Enables a telephone interconnect function with the NXR-700/800 NEXEDGE repeaters in Trunking Mode
- Connects NEXEDGE systems to a PSTN/PABX network via a Telco Unit (Zetron M30/735 or similar)
- Customizable DTMF command set & tone timer for telco
- Up to 100 phone lines per system, 6 per site
- Upgradeable firmware & FPU settings via remote IP access (future option)
- Telephone interconnect for NEXEDGE conventional network (future option)
- Powered by the NXR-700 / 800 - no need for an additional power supply

EU EMC Standard: EN 55022 & EN 55024

EU Safety Standard: EN 60065 & EN 60950-1 FCC Part 15 Standard

KTI-3 Delivered with:

- Telco cable (1m)
- Users manual (English, Spanish, German, French, Dutch, Italian, Turkish, Greek & Russian)

A Worldwide Recognised Standard for Trauma Care

ITLS Completer is the perfect next step if you choose ITLS eTrauma to earn your ITLS Provider certification. The Completer course is an in-person session that features eight hours of hands-on skill demonstration, practice and testing, plus the written exam required for Provider certification. You'll earn your ITLS Provider certification and card at the completion of this course. Together, ITLS eTrauma and ITLS Completer are your flexible solution for ITLS Provider certification.

eTrauma presents the eight hours of ITLS Provider classroom instruction in a selfpaced, online format that adapts to your schedule. It reinterprets course lectures with 13 lessons featuring video clips, quiz questions, click-and-drag matching exercises, new case studies and other interactive tools. You can use ITLS eTrauma for continuing education or as the first step in achieving your ITLS Basic or Advanced Provider certification. Either way, you'll maximize your learning and retention with online education that's innovative, flexible and affordable.

ITLS Provider includes eight hours of classroom instruction, eight hours of hands-on skills training and testing for ITLS Basic or Advanced certification. Innovative skills stations let you practice the abilities appropriate for your level of certification:

Patient assessment and management / Basic and advanced airway management / Spinal motion restriction - rapid extrication, short back board, helmet management, log roll and long back board/scoop stretcher utilization / Extremity immobilization and traction splint application / Needle chest decompression and fluid resuscitation (for Advanced certification) / With its comprehensive approach to core knowledge and skills, ITLS Provider is appropriate for all levels of EMS personnel - from EMT-Bs and first responders to advanced EMTs, paramedics, trauma nurses and physicians.

ITLS is the smart choice for your Trauma Training, because it's:

PRACTICAL - ITLS trains you in a realistic, hands-on approach proven to work in the field-from scene to surgery.

DYNAMIC - ITLS content is current, relevant and responsive to the latest thinking in trauma management.

FLEXIBLE - ITLS courses are taught through a strong network of chapters and training centres that customize content to reflect local needs and priorities.

TEAM-CENTERED - ITLS emphasizes a cohesive team approach that works in the real world and recognizes the importance of your role.

GROUNDING IN EMERGENCY MEDICINE - Practicing emergency physicians-medicine's front-line responders-lead ITLS' efforts to deliver stimulating content based on solid emergency medicine.

CHALLENGING - ITLS course content raises the bar on performance in the field by integrating classroom knowledge with practical application of skills.

Visit mediprotraining.co.uk/courses or call 08458387322 to book any of these ITLS courses.

Payment

Payment for non-credit account holders and all export orders must be made by cleared payment before dispatch. Payment options include bank transfer, cheque, PayPal and all major credit and debit cards. The seller reserves the right to decline certain types of payment without reason. The seller may also request payment before certain goods are ordered in from both account and non-account customers.

Written orders from account customers by fax, post or e-mail which clearly show the originating organisation will be accepted as official orders. The seller will accept no liability for miss ordering within an account holder's organisation. All valid Medipro product codes and quantities will be accepted as having been checked.

VAT Exemption

All prices in the price list and internet site are displayed ex VAT, VAT will be charged at the current UK VAT Rate for all products, services and carriage charges except where specified.

Customers claiming to be exempt from VAT under the zero rated schedule must always submit a VAT exemption certificate along with a written order; otherwise VAT will be charged and cannot be refunded. Account customer orders will not be accepted by telephone without an official order number.

Persons disabled or chronically sick may be eligible for relief against VAT on certain products, relating to domestic & personal use only, with reference to VAT notice 701/7. If you believe this is the case please ask for details at the time of order.

Please note that not all products are eligible for zero rating.

Credit Accounts

New credit accounts may be opened upon receipt of two satisfactory trade references, full banking details and with the agreement of Medipro management.

Public and Government Authorities may be treated as account customers upon receipt of a written order, signed by a duly authorised officer. Voluntary organisation must complete an Account Information Form to be signed by an authorised person.

Distributor accounts are only provided for agreed bona fide distributors.

Title of Goods

Risk in the Goods shall pass on to the buyer on delivery for UK customers and on dispatch for all export orders. Title in the Goods shall not pass to the Buyer until final payment has been made.

All goods remain the property of Medipro until payment is received.

Delivery of Goods

Delivery dates given by the seller are approximately only and do not form part of the contract. The seller accepts no liability if delivery dates are not met. The seller reserves the right to amend its prices without prior notice.

Medipro reserves the right to update its published prices. The buyer has the responsibility to check product prices and any discounts or special prices at the time of ordering. Any requests for bulk pricing, export or tenders will be made on an ex-works basis only.

Carriages not quoted in the price list and will be charged at the current rate on all orders. The seller will endeavour

to use the most cost effective means of deliver but makes no guarantees regarding delivery. Restrictions on the sale of certain good apply and the seller reserved the right to refuse orders where restrictions apply. The buyer is requested to co-operate fully when certain checks are required by Company Policy, and various national regulations.

When signing for the good the customer should always ensure that the external packaging is not damaged or appears to have been tampered with; if so this should be noted on the carrier's delivery sheet. The signature "UNEXAMINED" is regarded by the carriers as equivalent to a clear signature. A verbal notice of shortage is unacceptable.

Returns

Goods cannot be returned without the prior permission of Medipro and the issue of a valid returns authorisation number which must be clearly marked on the outer carton packaging (not the product packaging). Goods must be returned complete with the manufacturers accordance with the Terms and Conditions may (at the discretion of Medipro) either not be accepted or attract a re-stocking and administration charge (whether or not a credit is due) of:

- Within 4 weeks of delivery – 15% handling charge
- Within 1-3 months of delivery – 25% handling charge
- Agreed returns will be subject to a minimum charge of £15
- Special order, non-stock items and/or exceptional quantities are NOT eligible for return, unless explicitly agreed, by the company in writing beforehand.

The issue of return authorisation number does not constitute acceptance by the seller that a credit will be made. Risk in returned goods will not pass to Medipro until a credit is made.

Any alleged defect or delivery shortages must be notified, in writing by th buyer to Medipro within 3 days of delivery. Complaints in respect of alleged defects will not be grounds for the buyer within payments, and give no right of set-off against payment due from the buyer defect a stated in these Terms and Conditions.

Medipro may at its discretion refund reasonable costs of return when issuing a credit. Where a credit is refused the goods remain the responsibility of the purchaser.

Goods of a type not normally held in stock, and therefore specifically ordered are non-returnable expect under any warranty.

Under no circumstances will Medipro be liable for:

- Defects or damage resulting from fair wear and tear, neglect, improper use by the buyer, or failure of the buyer to comply with the manufacturer's instructions.
- Goods which have been adjusted, altered, adapted or repaired.
- The suitability of any goods for any particular purpose or use whether or not the purpose or conditions were communication to the seller.

Intellectual Property

All content included in our catalogue or our Web Site (www.medipro.co.uk), unless uploaded by Users, including, but not limited to, text, graphics, logos, icons, images, sound clips, video clips, data compilation, page layout, underlying code and software is the property of Medipro.

Limited, our affiliates or other relevant third parties. By continuing to use our catalogue or our Web Site you acknowledge that such material is protected by applicable United Kingdom and International intellectual property and other relevant laws.

Subject to exceptions detailed in the Copyright Designs & Patents Act 1988, you may not reproduce copy, distribute, store or in any other fashion re-use material from the Catalogue or Web Site unless otherwise indicated in the Catalogue or unless given express written permission to do so by Medipro.

Our Web Site may contain links to other sites. Unless expressly stated, these sites are not under the control of Medipro or that of our affiliates. We assume no responsibility for the content of such Web Sites and disclaim liability for any and all forms of loss or damage arising out of the use of them. The inclusion of a link to another site on our Web Site does not imply any endorsement of the sites themselves or of those in control of them.

Liability

Except in respect of death or personal injury caused by the company's negligence, the company will not be liable for any representation, implied warranty, condition or other term, or any duty at common law or under express terms of this contract, be liable for any loss of profit or any indirect special or consequential loss, damage, costs, expenses or other claims (whether caused by the Company's servants or agents or otherwise) which arise out of or in connection with the supply of the Goods and Services.

E & O.E

Every effort is made to keep our catalogue/ Internet pricing and content description error free. In the event of an error in pricing, Medipro reserves the right to withdraw a product from sale.

All catalogue and internet photography is intended as a guide to the products appearance, all items pictured which are additional to the core product are displayed for guidance purposes only unless otherwise specified in the product description. Medipro operates a policy of continual improvement to its product range; items may be replaced with products of an equivalent or superior specification at any time.

In the event of any conflict between these Terms and Conditions any prior versions thereof, the provisions of these Terms and Conditions shall prevail unless it is expressly stated otherwise.

Sales of Knives or Bladed Articles

It is an offence for any person under the age of 18 years to purchase most kinds of knives. We shall only supply knives and related equipment to customers over the age of 18 years. The sale of knives and bladed articles are regulated by law and subject to these Terms.

We reserve the right to refuse the sale if we have reasonable cause to believe you are below the age of 18 years, or if we believe that the supply of Goods to you may infringe the law or present an unacceptable potential risk to the safety of others.

Our main goal is to promote the safe use of the specialist tools and for this reason we always take steps to ensure that our knives and tools are promoted in a responsible manner.

Sales of Restricted Items

Select items require authorisation in order to complete the sale. We will contact you, the customer in order to obtain the information we require at the point of order.

We reserve the right to refuse sale if we have reasonable cause to believe you're not eligible to purchase these goods, or if we believe the supply of Goods to you may infringe the law.

Credit Card Security

Using your credit card to make purchases via our website is a secure way to pay for your good and is as safe as booking through our telephone sales system.

All sensitive information, including personal details as well as credit card information is kept confidential through the use of our secure server software. This means that information can only be exchanged between you and us and that a third party cannot access this data.

All historical information regarding credit card, name and address details is held on a secure computer. We do not retain live records of customer's personal details or credit card information on our web server after the transaction has been completed. (i.e you will need to enter your details each time you book over the internet)

Credit/debit card payments will be automatically encrypted using Secure Socket Layers (SSL). This technology ensures that your credit/debit card numbers are not accessible by unauthorised persons and are as safe as possible. This means the credit and debit card numbers are securely processed into code when sent to us. Only the scrambled encoded date is then sent over the internet, which MediPro received and decodes.

Furthermore, as requires by the UK Data Protection Acts of 1984 and 1998, we follow strict security procedures in the storage and disclosure of information which you have given us, to prevent unauthorised access. If you would not like your information held, please inform us and it will be securely disposed of.
